

# P418 Short Term Timeline

M1 indexers is Milestone 1. Goal to have all 3 initial indexes working on OpenCore & BCO-DMO and the indexes connected to the geodex.org and APIs by the end of Nov.

## Activities

- Vocabulary publishing and alignment
- \*Spatial index only point, line & poly next
- Indexer development
- Notebook development (concurrent with APIs)
- \*\* Look for and act on various data package types and route through services if available (validation and visualization)

## How to Engage

- Publish JSON-LD and sitemaps
- Interest in harvesting the JSON-LD
